

MINING MASTERS OF ENGINEERING PROGRAM- PROGRAM OF STUDIES WORKSHEET

- Original
- Revision

Name: _____
Family Given

Student #: _____ Start Date: _____

- Specialization:
- Mining/ Mining Geotechnics
 - Mineral Processing
 - Mine Environment and Sustainability
 - Mine Economics and Finance
 - Mine Waste Management
 - Other _____.

All Specializations are required to take the following courses:

Required Courses:

MINE 501A & B*- Topics for Engineers in the Mining Industry	(4) (T1 & T2)
MINE 559*- Indigenous Peoples and Mining in Canada	(3) (T1)
MINE 598**- Graduate Student Seminar	(2) (sect. 001)
	9 credits

Recommended Specialization Courses: (see attached) **9- 13 credits**

Electives: (see attached) **5- 9 credits**

MINE 597- Engineering Project (register in final term-T3) **6 credits**

Total: (minimum of 30 with 24 at 500- level) **30- 34 credits**

Notes: _____

Graduate students can take a maximum of 6 credits of 300 and 400 level courses for credit towards degree. 60% is the passing grade for graduate students in every course. There is a limit of 6 credits with grades between 60 and 67%. More than 6 credits and you will need to retake courses or take additional courses.

MINE 396 is recommended for all students with an international undergrad degree who are hoping to apply for P.ENG. status in Canada.

*Graduates of a Mining Engineering Degree from a North American University may be granted an exemption.

** All graduate students are expected to attend the seminar. To receive credit for the seminar a presentation must be made at the seminar. If you elect not to do the presentation, you will need an additional 2 credits of coursework.
